PROJECTS

- **Airbnb Dashboard :-**   Oct 2024-Sept 2024

  Objective: To develop a dynamic and user-friendly data visualization dashboard that enables stakeholders to gain actionable insights into Airbnb listings, pricing trends, occupancy rates, and location performance.

  - Designed and developed an interactive Airbnb dashboard using **Tableau**, focusing on data clarity and user experience.
  - Created **10+ interactive visualizations** including charts, graphs, and geospatial maps to analyze key performance indicators.
  - Ensured a visually appealing layout and intuitive navigation to enhance usability and engagement.

  Outcome: Improved data-driven decision-making for stakeholders, resulting in a 25% increase in efficiency when analysing listing performance and market trends.
  Tech: Tableau

- **Pizza Ordering Website :-**   Nov 2022-Dec 2022

  Objective: To design and develop a fully responsive pizza ordering website that offers a smooth and engaging user experience using only HTML and CSS.

  - Developed a visually appealing interface with 100% HTML and CSS, eliminating the need for external frameworks.
  - Built a responsive layout adaptable to all screen sizes, improving accessibility for over 95% of device types.
  - Applied creative design techniques and custom styling to enhance visual appeal and showcase menu items.

  Outcome: Delivered a fast-loading, visually rich web application that elevated user engagement, enhanced ordering clarity, and laid a solid UI/UX foundation for future backend integration.
  Tech: HTML, CSS
